Sanding Disc Anatomy

2 DIFFERENT VARIETIES

SPDG

Properties:
Ø 150 mm - 15 holes
Grit: 40 - 800

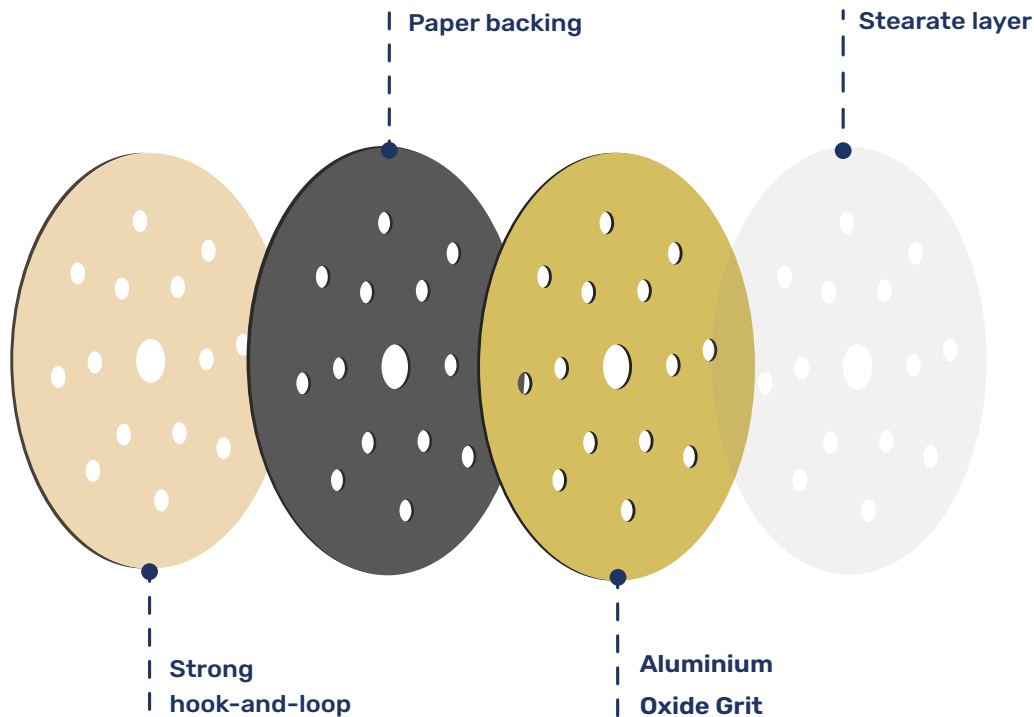

SPDH

Properties:
Ø 150 mm - 7 holes
Grit: 40 - 800

SPDH / SPDG

Strong, durable, and precise! Yellow Sanding Discs combine premium aluminum oxide grit with **excellent strength** for consistent, ultra-fine abrasion. The multi-hole design maximizes dust extraction, delivering **cleaner sanding and flawless finishes** every time.

DEPENDABLE AND DURABLE

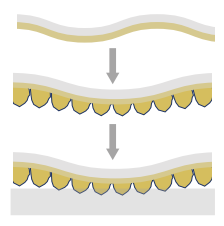

This high-quality sanding disc offers reliable performance for everyday use. Built on a solid, durable base, it delivers consistent results without compromise. An excellent all-round choice for professional and general sanding tasks.

ALUMINIUM OXIDE GRIT

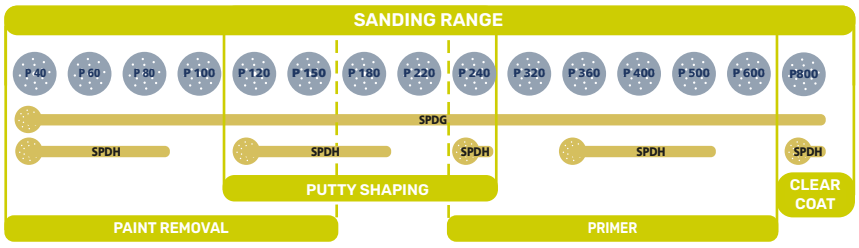

SPDG/SPDH discs feature aluminum oxide grit that wears down uniformly, providing consistent cutting performance and reliable results throughout the sanding process.

PAPER CARRIER

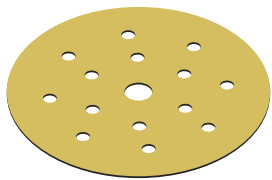

This disc has a paper carrier, designed to create a varied scratch pattern for optimal cutting performance, enabling aggressive sanding and fast material removal.

ABOUT ABRASIVES YELLOW

Precision and durability for a flawless finishes.

Yellow Sanding Discs combine premium aluminum oxide grit with excellent strength for smooth, consistent abrasion and long-lasting performance. Designed specifically for dual action sanding machines, their 7/15-hole pattern ensures optimal dust extraction for cleaner, more efficient sanding. Perfect for fine sanding and finishing on modern paint systems and delicate surfaces.

Application:
Preparation and finishing
