

## Colad Coated Masking Paper

High performance Coated Masking Paper

Prevent paint from bleeding through and keep your surfaces clean with this special Coated Masking Paper. The paper has a glossy, protective coating. This heavyweight paper is suitable for the most demanding paints, powder coatings and stoving enamels. Thanks to its extra heavy-duty quality, the masking paper can also be used for vertical applications.

This Coated Masking Paper is excellent for masking cars and parts, but can also be used during regular paintwork. With the non-stick surface, heat resistance and clean removability it ensures superior protection of surfaces during all sorts of paint jobs. The Coated Masking Paper is available in 6 different sizes.

- Non-stick to paint, lacquer or filler - The coating prevents paint, lacquer, filler or overspray from adhering to the paper. This keeps the masking material clean and leaves no residue on the surface.
- Heat resistant in spray booths - The paper withstands the high temperatures used in drying cycles inside spray booths without deforming or breaking down.
- Sharp paint lines - Due to its smooth surface and dimensional stability, the paper enables clean and sharp masking lines. Masking tape adheres well and removes cleanly without tearing.
- Lint- and dust-free - Does not shed fibres, which is crucial in paint environments that require dust-free conditions for a flawless finish.
- Strong and flexible - Durable enough for workshop use, but also flexible enough to contour around car body edges and curves
- Resistant to chemicals and solvents - Withstands exposure to solvents, hardeners and other automotive paint products without degradation

**Article number:** 2300xxx

**Description:** Coated Masking Paper

Art no.	Variant	EAN
230020	20 cm	8714247092002
230040	40 cm	8714247092217
230060	60 cm	8714247092071
230090	90 cm	8714247092149
2300120	120 cm	8714247092286
2300150	150 cm	8714247092354

## Packaging information

Roll with label

## Technical information

- Colour: Yellow / beige
- Material: Virgin Paper with coating
- Roll length: 240 m
- Roll width: Available in 6 different sizes (20, 40, 60, 90, 120 and 150 cm)
- Core diameter: 50 mm
- Thickness: 53 micron Conform ISO 534
- Grammage: 60 g/m<sup>2</sup> Conform ISO 536
- Tensile Strength CD: 2.6 kN/m
- Packaging: Roll with label

## Frequently Asked Questions

> **What makes the Coated Masking Paper better than regular masking paper?**

This heavyweight masking paper is suitable for use with the most demanding paints, powder coatings, and stoving enamels.

> **Can this masking paper be used in high-temperature spray booths?**

Yes, it doesn't deform or break down during drying cycles, making it ideal for professional spray booth applications.

> **What types of jobs is this masking paper suitable for?**

It's perfect for masking cars and parts, but also highly suitable for general paint jobs. Thanks to its strength and flexibility, it easily conforms to flat and curved surfaces, ensuring clean and sharp paint lines.
